

A CHANGE TO RELION® INSULIN

Walmart and Eli Lilly and Company have teamed up to provide the Humulin® brand of insulin under the dual-label brand, Humulin® ReliOn®. **By the beginning of October 2010**, only the Humulin brand of insulin will be available as the ReliOn brand in 10 mL vials at your Walmart pharmacy in the following formulations:

- Humulin® R U-100 (regular insulin human injection, USP [rDNA origin])
- Humulin® N (NPH human insulin [rDNA origin] isophane suspension)
- Humulin® 70/30 (70% human insulin isophane suspension, 30% human insulin injection [rDNA origin])

Both Walmart and Lilly are committed to making this change as smooth as possible. Walmart has been actively communicating news of this change via direct mail and a patient Frequently Asked Questions (FAQ) document available at Walmart.

The Humulin-ReliOn brand will mean a change in the manufacturer of your patients' ReliOn insulin. If one of your current patients already uses ReliOn insulin, a pharmacist may contact you regarding the change, if necessary.

Any change of insulin should be made cautiously and only under medical supervision. Changes in strength, manufacturer, type, species, or method of manufacture may result in the need for a change in dosage. If an adjustment is needed, it may occur with the first dose or during the first several weeks or months.

For more than 85 years, Lilly has been a worldwide leader in creating industry-leading solutions to support people living with and treating diabetes. Walmart continues to take the lead in providing quality, low-cost healthcare products to patients, pioneering and expanding access to affordable prescriptions.

If you or your patients have any questions about Humulin-ReliOn, we encourage you and them to visit ReliOn.com or contact Lilly at 1-800-LillyRx (1-800-545-5979).
